GPS TRACKING

HCP HUNTER merges GPS technology with affordable wireless coverage. The result is easily accessible information on a vehicle's location, stops, idling and mileage that can be quickly analyzed and help you find addresses and dispatch your closest vehicle.

- ✎ Real time vehicle monitoring
- ✎ Find the closest vehicle to an address or landmark
- ✎ Vehicle data updated as often as you like. (5 minutes or less)
- ✎ "Ping" Vehicles for Position Updates if Needed Between set Intervals
- ✎ Customizable Vehicle groups, names and Colors
- ✎ Monitor vehicle events through built-in sensors and switches (refrigeration temperatures, door opening/closing, fuel pump on/off, etc.)

Alerts

Alerts are a useful tool in monitoring your vehicles and in tagging any unconventional behavior.

HCP HUNTER provides Instantaneous Notification When User-Definable Violations Occur.

Alerts can be configured to send an e-mail or SMS message

- ✎ Speed violations
- ✎ Odd Hours of Operation
- ✎ Arrival at predefined Location
- ✎ Departure from Location
- ✎ Vehicle Use on Weekends
- ✎ Sensor initiated alerts (Idle, Cargo door, Lift, etc.)
- ✎ Enter and Exit geofencing Zone
- ✎ First Movement of the Day
- ✎ Extended Stop
- ✎ No Movement
- ✎ Fleet Service Alerts

Reporting options

Use **HCP HUNTER** reports to confirm driver deliveries, improve driver safety, or to monitor vehicle performance.

Analyze – view an “instant replay” of the routes workers took during a certain time period. Worker times automatically recorded and displayed.

Miles report - provides information about the total mileage driven during a specific time.

Stop report - provides information about each stop a worker made during the day.

Speed exceeded report - indicates when a worker exceeded a certain rate of speed for security and maintenance reasons.

Closest Vehicle – Quickly find closest vehicle to new delivery location and speed up delivery process.

Fleet Status – Instantly view location of all vehicles in the fleet.

Location based stop report - Import a list of landmarks, such as customer locations and generate automatic delivery checking.

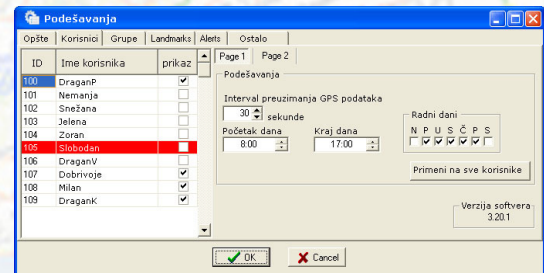

Maintenance – Enter data about last maintenance service of vehicle and get alert when to service. Reduce wear and tear on vehicles.

Drivers - Know exactly where all your workers are. Know when they started working, how long have they been working. Set a worker's home position. You're alerted when the worker travels outside this area during a nonworking hours.

Monitored drivers are safer drivers!
View current and historical speed violations!

Users and user groups

- ☛ Divide your fleet into groups (regional, vehicle type. . .)
- ☛ Assign users to view or control groups
- ☛ Chose actions that users can perform
- ☛ Assign drivers to vehicles
- ☛ Define working time of users
